

FLOORS FOR EVERY ENVIRONMENT

Problem: Betadine Staining in Operating Rooms

Solution: Stonhard's Stonres RTZ
with Stonkleen SR9

One of the most demanding environments within a hospital is the operating room. The floors in an OR environment are exposed to continuous impact, abrasion and chemical spills. When Stonhard's Stonres RTZ, a seamless urethane floor system was introduced in the marketplace it swept the design world with its progressive look along with benefits that are sensitive to healthcare environments. Finally healthcare planners and maintenance managers have a solution that meets everyone's needs, including the problem of betadine staining on floors. Stonres RTZ stands up to betadine, the antiseptic chemical renowned for the yellowish-brown stains it leaves on traditional flooring surfaces like vinyl tile and sheet goods. Betadine will stain the surface of almost anything, and will even stain Stonres RTZ, however the technology of the RTZ system not only helps to resist betadine stains it makes stain removal possible.

Stonhard's seamless, easy to maintain Stonres RTZ floor along with Stonkleen SR9 stain remover eliminates the problem of betadine staining in ORs.

The Clean Up

Betadine spills on Stonhard's Stonres RTZ flooring should be cleaned within 8 hours of the initial spill. To remove stubborn betadine stains, Stonhard formulated a fast-acting, easy to use stain remover, Stonkleen SR9. Instructions for proper use of SR9 are found on SR9 packaging and at www.stonhard.com or www.stonkleen.com.

Convenient and easy to dispense, Stonkleen offers a hanging bracket to hold Stonkleen SR9. The Betadine Response Wall Bracket is designed for hospital ORs and scrub stations so you are never without an on-the-spot betadine cleaner. The Betadine Reponse Kits can be sold in bulk to hospitals and healthcare facilities. Order them using the order form on the Stonkleen.com website or call Stonkleen, 866.505.7866 for more information.

The Follow Up

Proper care and maintenance of the floor is critical to maintaining its longevity and stain resistance. Therefore, post installation follow-up with hospital maintenance staff is important to ensure proper education regarding floor cleaning and care.

Stonres RTZ is a floor that does not ask you to sacrifice performance for design. It is a reliable solution for healthcare facilities providing exceptional acoustic efficiency, a resilient surface for staff who are on their feet for long periods of time, low life-cycle costs, minimum maintenance and along with Stonkleen SR9, the answer to the challenge of betadine staining.
